BS in Computer Science
Western Leyte College | 2021 – 2025

- Graduated Magna Cum Laude
- Programmer of the Year – 2025
- Capstone Project of the Year – 2025
- LGU Scholar Awardee
- Academic focus: Full-stack development, software architecture, database design
- Capstone: Crime Guard System – SPA & MVC
- Represented the college in major programming competitions:
  - EVCO Regional – 3rd Place (2023), Champion (2024)
  - iSITE National Level – Java and Python

WORK EXPERIENCE

Revolution of Kitten, Inc.
Intern Software Engineer | Feb 2025-June 2025

- Led mobile responsiveness implementation for the Azusa (Normal User) interface using Vue.js, Oruga-UI, and CSS Grid/Flexbox
- Developed, debugged, and maintained features in the Matterport SDK JavaScript library for 3D visualization and interaction
- Improved performance in the Architwin Basic Project by removing redundant API calls and introducing client-side caching using localStorage
- Fixed key bugs in server-side rendering and SDK integration, enhancing load time from 50s to 8s
- Actively participated in daily agile standups, sprint planning, and team debugging sessions using GitLab, Redmine, and Slack
